## EQUIPMENT

### WildBlue Minidish

WildBlue's minidish (28" x 26") both receives signals from the WildBlue satellite, and sends signals from the customer up to the satellite. Using the latest microwave receive and transmit technologies, WildBlue offers a small, efficient minidish which can be mounted on a roof, wall or via pole mount in the ground. We provide professional installation of the WildBlue equipment which will take approximately 2-3 hours. A [manufacturer's limited warranty](#) is available on all equipment.

### WildBlue Satellite Modem

A WildBlue modem is required to connect one or more customer PCs to the WildBlue network. WildBlue uses standardized modem technology based on the DOCSIS cable modem standards to offer a low-cost, small satellite modem. WildBlue provides professional installation of the WildBlue equipment which will take 2-3 hours. A [manufacturer's limited warranty](#) is available on all equipment.

### HOW IT WORKS DEMO
