SPEED DEMO

Here is a speed demonstration that clearly illustrates the advantage of WildBlue's Satellite Speed Internet® service:

How much faster is WildBlue?

Click below to compare WildBlue's download speeds versus dial-up.

[WEB PAGES](#) | [PHOTOS](#) | [MUSIC](#) | [VIDEO](#) | [STOP](#)

WILDBLUE 0:00

Download Time for a 150K Web Page:
1 second

DIAL-UP 0:18

Download Time for a 150K Web Page:
21 seconds

WildBlue's broadband service will allow you to access the Internet at speeds up to 1.5 Megabits per second (or 1,500Kbps) - - that's more than 30 times faster than today's dial-up connections. With a 2-way wireless connection via satellite, WildBlue's speed is maximized both ways.

Downloading a Web page that might take 21 seconds on a dial-up service will take less than 1 second with WildBlue Internet access. [That's fast!](#)

WILDBLUE REACHES ME Real WildBlue Stories

"I am looking for a high-speed connection in the middle of nowhere. If the service is as expected, I will extend the service to a higher throughput and use it for my business as well. This service sounds awesome and I can't wait to be a part of it."

Alan
Ocala, FL
